GOAL

Junior DevOps, System Administrator, System Engineer

EDUCATION

BSUIR,
Faculty of Computer
Systems and Networks

EXPERIENCE

JSC "BNB-Bank" (2022 - present)
CJSC "Banking and financial television network" (2021-2022)
National Bank of the Republic of Belarus (1999-2021)

Building an IS based on a hybrid model of cloud services, based on data centers of various vendors ("hybrid cloud", based on VMWare OS).

Modernization of the corporate system of servers and server services, with the transfer to a virtualization environment, and the construction of a 3-site architecture.

Administration of a distributed IS server infrastructure ((based on Windows 2012-2019 (AD, DNS, DHCP, WSUS, GPO, RDS, IIS), corporate email systems based on MS Exchange 2010-2013)).

Administration of cloud services of the organization based on Microsoft O365, MS Teams software.

Administration of a distributed network infrastructure of IS based on equipment from Extreme Networks, Cisco.

Administration of information security devices based on Fortinet solutions.

Implementation of a system for remote access to IP resources (based on the VMWare WorkspaceONE software solution).

Implementation of a centralized backup system (Veeam Backup software).

Organization of work on the creation of a centralized monitoring system based on Zabbix.

KEY SKILLS

Windows
Linux
AWS Cloud
IaC
CI/CD
